### Profile

A dedicated and results-driven software engineer with extensive experience in full-stack development, database architecture, and innovative technology integration. Skilled in implementing scalable systems, including revenue-generating platforms. Recognized for driving impactful projects across diverse industries and consistently delivering high-quality, user-focused solutions.

### Work Experience

#### Fullstack Lead Developer

February 2024 – Present

##### Sandlot Technology Ventures, Inc.

Developed and successfully launched a web-app comprehensive car rental CRM system that facilitates seamless interactions between hosts and guests directly on the platform. The system has proven highly effective, driving substantial revenue growth and demonstrating its value as a reliable and profitable solution in the car rental industry.

#### Junior Software Engineer

April 2023 – January 2024

##### Project Grey, Inc.

Developed Chatbot Solution with ElevateLab, GPT, and Twilio: Effortlessly embed our chatbot into websites, leveraging ElevateLab's natural voice technology, GPT's advanced intelligence, and Twilio's capabilities to deliver a robust and engaging user experience.

#### Fullstack Web Developer

June 2022 – September 2022

##### KlaudSol, Inc.

Extensive expertise in designing database architectures, managing user accounts, and serving as the lead developer for Klaudsol CMS, a platform successfully utilized across various projects in the company.
